

APPENDIX

Changes to Specification:

The following is a marked-up version of the amended paragraph:

The present invention adds acetylene glycol, in which each carbon atom immediately adjacent to a two-adjacent triple-bonded carbon atoms ~~are~~is replacedsubstituted with a hydroxyl group and methyl group, and/or a non-ionic surface active agent, which is an addition product of the ethylene oxide, to the water polyurethane resin. For the surface active agent, Surfynol 104 and 140, produced by Nissan Chemical Industries, are recommended. Adding ratio between 0.01% and 1.0% to the solid content of the water polyurethane resin is desirable.

Changes to Claims:

The following is a marked-up version of the amended claim:

11. (Amended) A laminate comprising the polyamide film of claim ~~4~~8.
